PROJECTS

REMAINING PROJECTS ON GITHUB

Map Application Group Project (InProgress)
Led team as the Scrum Master for a collaborative group project, developing a cutting-edge map application using React and Node. Spearheaded backend development, implementing APIs for data retrieval, and seamlessly integrating innovative features to enhance user experience.

Housing Company Group Project
Contributed to a collaborative front-end web development project for a housing company, utilizing HTML, CSS, and JavaScript. Spearheaded data storage implementation, implemented interactive forms, developed various pages, and managed web storage and backend tasks including git repo.

Youtube Dummy Project
Demonstrating my proficiency in web development, created a YouTube replica using HTML and CSS. This project showcases my skills in front-end development, emphasizing my ability to recreate complex platforms.

One Page Site
A sleek single-page website utilizing HTML and CSS. Implemented responsive design principles to ensure optimal user experience across various devices.

Shakespeare Plays(JS)
Employing HTML and CSS to establish the initial platform. Upon clicking a button, seamlessly integrated JavaScript functionalities were activated, enriching the user experience.

Citrus Cafe Project
A responsive website using HTML and CSS.

Amazon Dummy Project using JavaScript
Engineered a dynamic project emulating the Amazon website, employing HTML and CSS for the foundation, while showcasing advanced functionality and interactivity through JavaScript.

Post It App, JavaScript
Designed and implemented a practical Post-it app using JavaScript, seamlessly utilizing local storage for data persistence. Showcases practical knowledge of client-side scripting for an enhanced user experience.

Rock Paper Scissor Game using JS
Developed an interactive Rock, Paper, and Scissors game using JavaScript, showcasing my proficiency in front-end scripting and game logic.Demonstrates my ability to create engaging web applications that incorporate user interactivity and dynamic functionality.

Country Data using React, Node, API
Full Stack React app leveraging two APIs to deliver comprehensive country information and real-time weather forecast feature. This project showcases my proficiency in React development, API integration, and creating informative, dynamic applications.

Notes App using React and Node
Developed React app with a Node.js backend and MongoDB for data storage, featuring the ability to save and toggle note importance seamlessly. Leveraged the MERN stack and render for deployment.

PhoneBook App using React and Node
Developed React app with a Node.js backend and MongoDB for data storage, featuring full CRUD functionality, enabling users to save, delete, and search phone numbers. Leveraged the MERN stack and render for deployment.
